Programming Languages: JavaScript, HTML, CSS, Python, Java, Bash, Smalltalk, Elixir, Haskell

Framework, Tools and OS: Git, VS Code, Figma, Trello, AWS, React, Node.js, Strapi, Postman, Windows, Linux/UNIX

EDUCATION

Computer Science Co-op, B.Sc. (Hons.) | Toronto Metropolitan (Ryerson) University

Sept 2021 - Apr 2026

- Awards: Entrance Scholarship (95+ Average), Dean's List
- Relevant Courses: Data Structures, Web Systems Development, Introduction to Software Engineering, Algorithms

EXPERIENCE

Web Developer Intern | Civiconnect

May 2024 – Aug 2024

- Produced a **full-stack application** with key features such as user dashboards, multi-step sign-up flow, and dynamic search functionality
- Delivered the project in an accelerated 4-month timeline—achieving completion in **less than half** the allotted time
- Assisted **4+** colleagues with troubleshooting code issues and providing guidance, leading to improved code quality and faster problem resolution
- Implemented a like/saved feature with state management in **Node.js**, utilizing **Postman** for API integration and testing to ensure persistent user preferences

Business Technology Analyst Intern | Dion Strategic Consulting Group Inc.

Sept 2023 - Dec 2023

- Integrated various forms of data through **Microsoft Fabric** in order to clean and perform efficient data analysis
- Processed and cleaned over **40,000** lines of data extracted through web scraping to generate valuable insights and gather information for the company
- Maintained and reworked **4+** insurance websites for various clients to create a seamless user experience for customers

Executive IT Support Intern | MPBSD Government of Ontario

May 2023 - Sept 2023

- Assisted **25+** clients with setting up their devices and facilitated device configuration, ensuring in a seamless onboarding experience
- Provided technical support to clients by offering various solutions to resolving technical issues through diagnosing and troubleshooting devices and softwares

PROJECTS

Discover Lincoln | React, JavaScript, Strapi

May 2024

- Developed a **fully responsive** tourist website, implementing an interactive map, individual pages for attractions, events, and organizations, including a history page and an invitation section for sharing events
- Architected and constructed reusable, modular components in **React.js**, enhancing code maintainability and scalability
- Leveraged **Strapi** CMS to create and manage dynamic content, utilizing **RESTful API** endpoints for efficient data posting and retrieval

SoundCheck | HTML, CSS, Python, SQLite

Feb 2023 - Apr 2023

- Managed a team of 5 to develop an online ticket purchasing system delivered through a web application that allows users to view and purchase concert tickets
- Utilized **Flask** framework and **SQL** to store the user's data and ticket information

Study Oppa | Python

May 2022

- Led a team of 4 to develop a multifunctional study Discord Bot with features including a pomodoro timer, flashcards, to-do lists and weekly calendar to enhance students' study sessions
- Utilized **discord.py** API wrapper and **JSON** to store configurations and data

LEADERSHIP

VP Operations | TMU Computer Science Course Union

Sept 2021 - Present

- Played a key role in overseeing the internal operations of the CSCU and effectively advocating for 1000+ students' interests and concerns as a student representative to the Department of Computer Science
